

TECHNOLOGY REPAIR COVERAGE REQUEST FORM

Parent/Guardian of [Your School] student,

Damage is an inevitable part of any device's lifecycle. [Your School] has set in place multiple ways for student devices to be repaired—including an exciting and engaging technology repair course (for more information on getting your student involved, please contact the Main Office)—to ensure that no student falls behind due to broken or damaged technology. As part of [Your Schools] student technology plan, we request that parent/guardians select a form of device coverage that works best for the individual family.

Please select one of the following Device Repair Coverage options below, and submit this form and payment (if applicable) to the main office before [preferred date].

OPTION 1: Pay-Per-Instance

Description: Parents/Guardians are sent a payment request form via email each time their student submits a repair request. The request will include a description of the damage, and a breakdown of the repair cost (shipping, labor, parts).

Cost: \$70/repair (estimated)

NOTE: For every 1000 Chromebooks in the hands of students, 60-120 will break each year (6-12% on average).

OPTION 2: One-Time Insurance Payment

Description: Parents/Guardians submit a \$60 payment once a year to cover the cost of any and all repairs done to their student devices. This does NOT include damage due to negligence or intentional vandalism.

Cost: \$60/year

Please Select One **OPTION 1**
